

# Basler's Newest Relay Gains Traction

## Introducing the BE1-11*d* - DC Power Protection System

Basler has provided the electricity market with solutions for more than 75 years. Our history has included a wide variety of products for both ac and dc applications.

The BE1-11*d* DC Power Protection System is a consolidation of our expertise in dc excitation systems and ac utility grade protective relays.

The BE1-11*d* consists of two main components: the base BE1-11*d* DC Power Protection System and the IT-D isolation transducer.

### ■ Proven BE1-11 Reliability

Extension of our BE1-11 for dc systems that are already used in traction and other critical applications.

### ■ Made in the USA

BE1-11*d* relays are built in Highland, Illinois and Taylor, Texas.
